

ANIMAL SCIENCE IN ACTION JUNE 6 & 7, 2011

...A SUMMER INTRODUCTION TO THE ANIMAL AND DAIRY SCIENCE DEPT., ANIMAL SCIENCE MAJORS, INCLUDING PRE-VET OPPORTUNITIES AT UGA

You are invited to participate on June 6 & 7, 2011 in our introductory program for high school students at UGA. Animal Science in Action is a 2 day program designed for rising high school juniors and seniors with an interest in a Bachelor of Science degree and career in animal science field. The University of Georgia Animal and Dairy Science Department encompasses science and hands-on learning opportunities with beef and dairy cattle, horses, swine, and sheep. A degree in animal science can lead to a great variety of careers including sales in feed and pharmaceuticals, Extension and other instructional roles, meats industry options, or many of the supportive roles in the livestock industry. Animal and Dairy Science degrees also can be tailored to satisfy pre-requisites for Veterinary or Graduate School.

High school students come to UGA to engage in a series of labs and experiences that gives them a “feel” for the Animal and Dairy Science program. Groups visit each of the main teaching farms for hands-on activities with the animals and other UGA sites. Students stay in a UGA dormitory to experience dorm life. Current Animal Science students lead various activities and interact with the students to share the opportunities available at UGA in Animal and Dairy Science. The program starts mid-morning on Monday and ends mid afternoon of the next day. Parents are invited to attend the opening and closing sessions that involve important admissions and financial information.

Application deadline is May 13, 2011. The event costs \$75.00/student. High school students should provide PSAT or SAT scores and be a rising junior or senior. We encourage you to get your application in today! You will receive additional information such as start times and housing once we receive your application.

For more information contact Dr. Kari Turner, kturner@uga.edu, (706-542-8588), Mr. Jary Douglas, jaryd@uga.edu, (706-583-8921) or Dr. Ronnie Silcox, rsilcox@uga.edu, (706-542-9102).

ANIMAL SCIENCE IN ACTION
